- Artificial Grass Cleaning & Treatments
- Resin Driveways Cleaned & Sealed

Professional Driveway Restoration

There are many types of driveway surfaces across the UK and like any external surface a driveway will soon look dirty if left to deteriorate without any aspect of maintenance taking place.

Our services will always pre-treat a driveway first prior to pressure cleaning. This is vitally important to ensure any stains are removed and any moss or algae growth is killed off before the driveway is rotary cleaned. Our rotary cleaning equipment guarantees to remove 95% more than a jet wash and not to damage any of your stone or block work whilst cleaning it.

To ensure our customers receive the best driveway cleaning service possible, we have developed a highly professional method to restore and seal any of the driveway or patio surfaces listed below:

Block Paving

WE SPECIALISE IN Pattern Imprinted Concrete Restoration

Tarmac & Asphalt

New Black Spot Removal

- Black Spot Removal Driveways
- Black Spot Removal Natural Stone
- Black Spot Removal Sandstone (Recommended)
- Black Spot Preventer

Patio Black Spot Remover is currently the only product developed specifically to remove those hideous 'Black Spots' and restore the natural colour your garden stonework. Patio Black Spot Remover for Natural Stone will remove 'Black Spots' from Indian Sandstone, York Stone, Limestone (including Bath and Portland Stone), Purbeck stone and other Natural Stones. Patio Black Spot Remover will restore the colour back into your stonework that you thought you had lost forever.

The Process:

1. **Clean all slabs or stone work prior to application,**
2. **Apply the solution neat and allow 24 hours to work its magic,**
3. **Clean off the solution by jet washing again, 100% Satisfaction guaranteed.**

To maintain your garden stonework and stop the 'return of the Black Spots', we can apply our Patio Black Spot Preventer annually. This will kill any 'Black Spot' spores before they have the chance to germinate and turn into spots and will also remove green algae without the need to power wash!

Resin Driveway Cleaning & Sealing

Do you own a Resin Bound Driveway?

Did you know that they require sealing every 3-4 years?

What's are the benefits of sealing my Resin Bound Driveway?

- **Prevents surface breakdown**
- **Prevents weed growth, algae and moss**
- **Prevents fading & Protects against UV rays**
- **Minimises frost & Freezing damage**
- **Helps prevent staining**
- **Maintains its permeable barrier**
- **Restores its sheen & Loss of colour**

If you don't reseal your resin driveway they will eventually breakdown, causing costly repercussions.

Professional Interior Floors Cleaned & Sealed

We specialise in Interior flooring cleaning and sealing. We use steam or low pressure rotary equipment so we can relieve your floors of tough dirt and grime that can hold in your grout joints and stone surfaces.

Using various floor cleaning chemicals we can remove these hard stubborn stains reviving the whole outlook of your flooring.

Sealers can be applied once the surface has been cleaned to prolong its cleanliness and surface durability. We can now even clean and seal porcelain tiles.

Surfaces we restore:

Natural Stones

Chinese slate

Lime stone

Indian sandstone

Granite

Porcelain (New)

and more.....

AlgoClear PRO

Using a new bio dynamic wall and tile cleaning solution we can now remove ghastly stains like moss, algae and carbon scoring from any hard surface. As approved installers of Algopro we can apply our new chemicals to clean your property without using jet washes that may be aggressive to the surface upon cleaning. Our soft washing custom built machinery allows us to work from floor level with precision and accuracy. The results are outstanding, not only will you see a vast improvement on the day of cleaning but Algopro will continue to work for a further five days after application.

Liquid Cement Pointing

- We offer a service of pointing your patio or driveway (Drives NO more weeds)
- Removal of existing cements or resins
- Unique liquid cement pointing, leaving it like it had just been laid
- Life expectancy 8-10 Years

Call for a Quote Now

The Process:

1. Clean all slabs or stone work prior to application and apply black spot remover is require (Optional black spot is not obligatory),
2. Apply the liquid cement solution in one area and move into all joints using our special applicator tool to allow an even finish,
3. Clean off the solution by soft washing and removing any excess while finishing one area at a time, 100% Satisfaction guaranteed.

The results are outstanding and even if you have loose slabs, stones they will be held back in place by our amazing liquid cement solution.

Sealing cannot be carried out after liquid cement solution is applied it will need 12 month to allow all the salts to disperse before it can be sealed.

Reads Garden

Wow what an amazing and professional job completed by Splash Clean to our communal walkways, just cannot believe the difference you made Thank you so much. Rob Swart

Geoff and Kathy

Kristian provided a clear detailed quote and discussed the options available. The cleaning and sealing was carried out very professionally. We never thought the Indian sandstone paving could be returned to its former glory It looks fantastic and we now have our garden back ! I will certainly recommend Splash Clean Caerleon. Kristian is very professional and honest as to what can be achieved. Geoff and Kathy - Cardiff

Sandra

Thank you Kristian, Excellent result, really pleased. Will recommend and use again.

Sen

Thank you so much Kristian for the hard work you did in cleaning my pavers drive. It looks great and exceeded my expectations++ Good to do business with such a nice guy too. Highly recommend you.

Mrs Susan Edwards

Thanks Kristian for a clean professional job on our patio, we have had so many good remarks since it's be done, can't wait for the nice weather to be able to sit out there. I recommend your company to all, if you want a job done well ring Splash Clean .

TP

Great job. Particularly impressed by the sealant finish which means my block paver patio dries quickly after a downpour of rain compared with my neighbours which stays wet for hours after. Would definitely recommend.

KAREN

Our driveway was quite a mess. Very discoloured block paving with lots of moss and weeds. Following a visit from Splash Clean Caerleon, the driveway is now immaculate - looks as good as new, far beyond what we thought was even possible. Great communication throughout. Would highly recommend. Thanks Kristian!
